Data Science - Research Issues and Applications

The session on "Data Science - Research Issues and Applications" was organized by the Department of CSE from 10th-11th January, 2020 to delve into the evolving landscape of data science, exploring the latest research challenges, trends, and practical applications. The session aimed to provide participants with insights into the interdisciplinary nature of data science, its emerging issues, and its far-reaching impact on various domains.

The session on "Data Science - Research Issues and Applications" proved to be both informative and enlightening for a total of 34 students of IGDTUW, shedding light on the evolving field of data science and its far-reaching implications. Participants gained a deeper understanding of the challenges, opportunities, and ethical considerations associated with data science research and applications.

The insights shared during the session are expected to inspire further exploration, research, and collaboration among participants in the realm of data science.
