Webinar on 'Learning with Weak Social Supervision for Fake News Detection' by Kai Shu,
Assistant Professor, Dept of CS, Illinois Institute of Technology, Chicago, US

The Workshop on Fake News Detection was organized with the aim of addressing the rising challenges of misinformation and promoting media literacy. The workshop focused on providing participants with tools, techniques, and strategies to identify and combat fake news in today's digital age. The event brought together researchers, journalists, educators, and concerned citizens to engage in fruitful discussions and collaborative efforts to combat the spread of fake news. The event was attended by a total of 45 students in an online mode.
